

What is Sequence Ontology?

The Sequence Ontology is a set of terms and relationships used to describe the features and attributes of biological sequence. SO includes different kinds of features which can be located on the sequence. Biological features are those which are defined by their disposition to be involved in a biological process.

Discuss Sequence Ontology Terminology

Please go to the [Sequence Ontology Discussion](#) page to leave comments regarding the Sequence Ontology Terminology.

Examples of comments may include:

- How you are using this terminology
- Why you decided to use (or not use) this terminology
- Strengths or limitations of the terminology
- Comparisons to other similar terminologies
